Activity Analysis Occupational Therapy

Activity analysis is the central function of occupational therapy. It is what makes us OTs. Do you ever think about why and how you analyze activities? Is it something that is just automatic for you, or do you use a formal system? How often do you use activity analysis to prove that your treatments are effective?

The Importance of Activity Analysis in Occupational Therapy

The activity analysis identifies the physical and temporal needs for the activity, the required client factor and performance skill needs for the activity,

and the therapeutic benefit of the activity. A complete activity analysis can assist in determining whether the activity in question will achieve the intended goals of therapy within the available timeframe and will be appropriate for the specific client.

Activity Analysis - All Things OT

One of the biggest differences was this assignment called an "Activity Analysis" (which took us weeks to complete). It is the specialty of an OT. It is what sets us apart from other therapy disciplines. Our interventions are based on a top down approach where we assess the activity our patients are unable to successfully complete.

Activity Analysis | Occupational Therapy
