### Nuclear Energy Solutions

As we enter the decade of the 2020s few subjects are as controversial as nuclear energy. With respect to climate change, nuclear energy adherents claim that the only solution to reversing climate change and addressing increasing energy needs is to build 10,000-12,000 new reactors; detractors say that the proliferation of nuclear reactors could have dire consequences due to more accidents, natural disaster events, and/or hostile actions targeting nuclear reactors.
