called rationalizing the denominator<sup>19</sup>.  
Radical expression Rational denominator  
 $1 \sqrt{2} = \sqrt{2} \cdot 1$

## 5.4: Multiplying and Dividing Radical Expressions ...

Since the radical is the same in each term (being the square root of three), then these are "like" terms. This means that I can combine the terms.

## Adding & Subtracting Radicals (Square Roots) | Purplemath

The idea is that students will attempt to write the expressions in simplest radical form using a common sense approach (e.g. multiply the number outside the radical by a number that is being taken out). By using their calculator, they will know whether their attempt is correct or incorrect and they can revise their work accordingly (MP1).
