Loosen the reservoir cap just a little, then step back while the pressure releases. Then, remove the cap completely. If the coolant level is low, add the correct coolant to the reservoir (not the radiator itself). You can use diluted coolant by itself, or a 50/50 mixture of concentrated coolant and distilled water.

Access Free Super Duty Engine Compartment Cooling

The Advanced Engine Cooling System uses a central radiator plenum, two electric fans and hood duct work to transfer hot radiator air to outside the body - not into the engine compartment. The system uses a full cowl induction hood scoop to supply cool air to the engine compartment and engine air intake system.
