Selections from the Principles of Philosophy. René DESCARTES (1596 - 1650), translated by John VEITCH (1829 - 1894) The Principles of Philosophy, originally published in Latin in 1644, and translated to French in 1647, sets forth the principles of nature--the Laws of Physics--as Descartes viewed them. The book provides a systematic statement of natural philosophy and metaphysics, and represents the first truly comprehensive, mechanistic account of the universe.

In mathematics, a selection principle is a rule asserting the possibility of obtaining mathematically significant objects by selecting elements from given sequences of sets. The theory of selection principles studies these principles and their relations to other mathematical properties. Selection principles mainly describe covering properties, measure- and category-theoretic properties, and local properties in topological spaces, especially function spaces. Often, the characterization of a mathe
