When he finally leaves, though, he exits a year after he fell in. Weird time shit isn't exclusive to the Abyss, a LOT of anachronistic reverse-engineered technology is in full effect by the 1960s because weaponry from the 80's and 90's keeps suddenly appearing across the globe (it's theorized to be the result of some sort of magical conflict during that period.)

The second method lists a river's tributaries by their flow. Small streams are identified with low numbers, while larger tributaries have higher numbers. The Tshuapa and Kasai Rivers are both left-bank tributaries of the Congo River, the deepest river in the world. The Tshuapa is a smaller river, and has a lower tributary ranking, than the Kasai.

The Nile River flows over 6,600 kilometers (4,100 miles) until emptying into the Mediterranean Sea. For thousands of years, the river has provided a source of irrigation to transform the dry area around it into lush agricultural land. Today, the river continues to serve as a source of irrigation, as well as an important transportation and trade route.

The River Erinin is one of the major rivers of the Westlands. It rises in the Spine of the World and flows westwards to form the southern borders of both Shienar and Arafel. In Shienar the river is about four days ride south of Fal Dara. It is only about sixty paces wide there, with a small village built on its banks and a ferry for crossing. It flows south from Arafel and is joined by the ...
