What Is a Solution? A solution is a homogeneous mixture of one or more solutes dissolved in a solvent. solvent: the substance in which a solute dissolves to produce a homogeneous mixture; solute: the substance that dissolves in a solvent to produce a homogeneous mixture; Note that the solvent is the substance that is present

ThoughtCo

A one solution equation is when an equation has only one solution. This means that when you solve an equation, the variable can only be substituted by ONE certain number.

One Solution, No Solution, Infinitely Many Solutions - Home

Bookmark File PDF What Is One Solution In Algebra

One Solution This is the normal case, as in our example where the equation $2x + 3 = 7$ had exactly one solution, namely $x = 2$. The other two cases, no solution and an infinite number of solutions, are the oddball cases that you don't expect to run into very often.

Solutions of Algebraic Equations

Bookmark File PDF What Is One Solution In Algebra

- One solution. In this case the two equations describe lines that intersect at one particular point. Clearly this point is on both lines, and therefore its coordinates (x, y) will satisfy the equation of either line. Thus the pair (x, y) is the one and only solution to the system of equations. 2.

The Solutions of a System of Equations

A solution is a homogeneous mixture of one substance dissolved in another. The molecules of a solution are evenly distributed throughout the solution. Solutions must have a solute and a solvent. The solute is the substance being dissolved.

Many students assume that all equations have solutions. This article will use three examples to show that assumption is incorrect. Given the equation $5x - 2 + 3x = 3(x+4)-1$ to solve, we will collect our like terms on the left hand side of the equal sign and distribute the 3 on the right hand side of the equal sign. $5x \dots$
